

State Project No. 28-0205

Replacement of Bridge No. 06389

Route 2 West Bound Ramps over unnamed brook at intersection with Norwich Ave/Rte 616

The project consists of the removal of a deteriorating large diameter metal pipe culvert located beneath the Route 2 West Bound on and off ramps to Norwich Avenue/Route 616 and replacement with a precast concrete box culvert.

Start date is May 28, 2017

Completion date is October 6, 2017

The majority of the necessary construction will be performed during a 14 day road/ramp closure which is scheduled to start on August 9, 2017. During this time, the on and off ramps will be closed and a traffic detour using Routes 85 and 616/Norwich Avenue will be set up. Message boards alerting motorists of the detour will be in place approximately 2 weeks prior to the scheduled closure/detour.
