

Linwood Avenue (RT 16) Construction of Streetscape

The Linwood avenue streetscape project construction will begin on June 11, 2014. Sidewalks, landscaping, lighting and other features are being installed.

Work will commence on the southern side of Linwood Avenue just east of the Stop and Shop main entrance. Work will proceed east up Linwood Avenue ending at the intersection of RT 85 and Linwood Avenue. While work primarily will be on the southern side of the roadway, there is a section of sidewalk to be installed in front of the Cragin Library. Construction will be completed in approximately 30 days from commencement.

Traffic flow might be disrupted at times as crews work in the public right of way. Please use other routes if congestion occurs. We thank you for your patience. For more information please contact the Planning and Zoning Department.
