

Request for Proposal
POST TENSION CONCRETE TENNIS COURT PROJECT
AT COLCHESTER RECPLEX

Bid #2022-008

NOW Due AUGUST 17, 2022 at 2:00 p.m.

ADDENDUM 3

The following changes have been made:

- 1) The deadline for submission has been extended from Wednesday, August 10th to Wednesday, August 17th at 2:00pm.
- 2) This line has been removed: "Vendor is to coordinate activities to ensure that no park location is closed for more than three (3) weeks."
- 3) The town is requesting the installation of a 4.5" to 5" 3,500 PSI concrete slab to be installed over the top of the existing asphalt courts.
- 4) New fencing is not required. Adjustments to the existing fence to accommodate the new concrete courts are required. The gate and transom require some minor repairs in order to function properly which should be included in your bid."
- 5) The RFP states that the finished elevation will be within 2" of existing. This has changed and an additional height is acceptable.
- 6) Temporary fencing and safety measures should be taken while undergoing construction. The courts are part of a very popular park. All measures, including temporary fencing, are expected to ensure consumer safety as well as the integrity of the ongoing construction. Construction fencing of 6' is required to keep people, bikes, roller skates and motor vehicles off the court during construction.
- 7) A +/- 10'x6' "ramp" will be constructed at the gate location to allow for access without a "step up".
