

## Southeast Resiliency Project – Phase 4

At Eversource, we know our customers rely on us to deliver reliable energy every day, and it's a responsibility we take seriously. Protecting and strengthening the natural gas distribution system is vital to achieving that goal, particularly as the demand for natural gas increases. That's why we are investing \$20 million in this multi-phase resiliency project during 2022. Coupled with our everyday efforts, this is an investment in our future and yours to deliver reliable energy and superior customer service.

We're pleased to share with you a summary of our fourth phase of resiliency work scheduled in Colchester, Connecticut.

## Southeast Resiliency Project Phase 4

**Resiliency:**

Eversource will be installing approximately six miles of gas pipeline to improve system resiliency between Middletown and Montville and increase the availability of gas supply options from one to three transmission companies. This connection allows natural gas to flow between the communities, making sure that gas is always there when customers need it. The project provides a link to potential access to natural gas in areas where clean efficient natural gas has not been an option.

**Scope of work:**

- Construction on Phase 4 is scheduled to begin in April 2022, and we anticipate concluding our work November 2022. As we perform our work, we will continue following the guidance issued by federal, state and regulatory officials during the coronavirus health crisis.
- Our work includes the installation of six miles of gas pipeline within Colchester, Connecticut.
- The pipeline is to be constructed in the state or town rights-of-way. Most will occur in the road – resulting in minimal impacts to private property.
- GPL Construction will be doing the work and three crews will work on this phase of the project.
- Traffic control, including police officers, flaggers and signage, will help maintain safe work zones and ensure unobstructed passage for emergency vehicles.

**Keeping Customers Informed**

- Eversource and its contractors will coordinate work with town officials and individual customers, where needed.
- Construction hours will occur Monday through Friday 8:30 a.m. to 4:00 p.m. on Route 16 West of Route 2 and on Route 149. Night working hours will occur Sunday through Thursday from 7:00 p.m. to 5:00 a.m. on Route 85 and Route 16 (from Route 85 to Route 2)
- All Eversource employees and contractors carry identification that they will gladly show.
