## TOWN OF COLCHESTER SENIOR CENTER BUILDING COMMITTEE JANUARY 19, 2021 – 6:00 P.M. VIRTUAL MEETING - SPECIAL

## **MINUTES**

Members in Attendance: Tony Tarnowski, Marilynn Turner, Kevin Hastings, Ron Silberman, Sean

Nadeau, Joe Ruiz

Alternates in Attendance: Madelyn Starkey, Geraldine Transue

Members Absent: Majorie Mlodzinski,

Alternates Absent: None

**Others Present:** BOS Liaison Rosemary Coyle, Director of Senior Services Patty Watts, Board of Finance Liaison Mike Egan; Silver/Petrucelli: Matthew Gallerani, David Stein; CSG: Mark

Garilli

1. Call to Order: Chairman Tarnowski called the meeting to order at 6:02 p.m.

2. Seating of Alternate members: None

3. Citizens Comments: None

- 4. Review and approval of proposed cost for Senior Center: The Concept Estimate was presented and reviewed. Two variations were given to reflect using a Construction Manager or General Contractor. A 1-year escalation cost was included. K. Hastings questioned the amount of contingency being included. Additional parking and site lighting at Town Hall for overflow parking was listed as an alternate. First Selectman said she felt the parking was an important part of the project and should not be listed as an alternate. She also felt the bonding costs should be included in the total, despite that in past projects it has not been, in order to be as transparent as possible on the actual cost of the project. There was consensus among members that the cost estimate to be presented at the joint board meeting should be \$8,612,115 plus the costs for parking at Town Hall, hook-up fees for gas and electricity, and bonding fees.
- 5. Citizens Comments: None
- **6. Adjournment:** S. Nadeau motioned to adjourn. Chairman Tarnowski adjourned the meeting at 7:19 p.m.

Submitted by,

Dawn LePage, Clerk

## **Colchester Senior Center**

## **Concept Estimate**

Date: 1.18.2021 Reconciled

# PACS LE

DATE: 1.18.2021 Reconciled

### **Basis Of Estimate**

#### **Basis of Estimate**

#### Introduction

PACS has been engaged by CSG to prepare a Cost estimate for the following project:

This Estimate is based on the following design information:

- Site Plan SP issued September 4th, 2020 by Milone & McBroom, Site plan 6 of 6 issued July 28, 2020 by Milone & McBroom
- Floor plan Option 12B-First floor 14,650 sf issued by SP&A Not dated
- Elevations A300 issued 12-08-20 by SP&A Not dated
- Colchester Senior Center Design Reviwew PDF (23 pages) dated September 22, 2020 by SP&A

#### Quantities and Methodology

- The cost estimate is based on the measurement of quantities wherever possible.
- Where actual measurements are not used, parametric measurements are used in conjunction with previous but similar project benchmarks.
- PACS uses a wide range of standard measurement and quantifying methods that are common practice in the construction industry today.

### Basis of Pricing

- a) The construction costs shown in this estimate represent the fair market value and are not intended to be a prediction of the lowest bid.
- The costs include: labor, material, equipment and the subcontractors overhead and profit. (Subcontractor's Mark Up)
- c) The cost of labor is based on local Prevailing wage rates for all trades.
- d) The construction rates used are based in "today's dollar" and an escalation allowance is included in the Estimate summary.
- e) Our pricing assumes competitive bidding on all elements of the construction work, assuming a minimum of three competitive bidders for all general contractors, subcontractors, materials and
- f) It is typical in our experience that if fewer bids are received or solicited, prices can be expected to be higher due to lack of competition.
- g) The subcontractor's mark ups include their own overhead, including the cost in the field as well as profit.
- PACS has priced this taking into account current market conditions, competition between trades and the cost fluctuations in the construction industry.
- i) Estimate assumes no Phasing required..
- j) Proposal is based on construction being performed on regular hours.

#### Design and Pricing Contingency

A Design and Pricing Contingency is used as a budgetary tool that allows for scope and detail not defined during the design stage. As the design becomes more defined as the project passes through the design stages, the Design and Pricing Contingency decreases as more scope and detail is now being shown in the documents and is therefore reflected in the cost estimate as actual trade cost. The Design and Pricing Contingency is reduced to zero at 100% Bid Documents.

## PASSUE Per Pascinas Grandity bones

DATE: 1.18.2021 Reconciled

#### **Basis Of Estimate**

#### Escalation

As outlined above the estimate is calculated using rates that are "today's dollar" and reflect the cost of the project as if it was to bid on the date of issue. Due to construction projects having long design phases and long construction schedules, its is imperative to project the construction cost further ahead into the future to the point at which it is bid out. It is common practice to escalate the cost estimate to the mid point of construction to accommodate for economic inflation. This percentage accounts for this increase.

#### Construction Contingency

PACS advise that a Construction Contingency is carried for unforeseen project conditions and field changes. Typically we see this in the range of 3% to 7.5% dependent on the scope of the project.

#### Probable Cost

It is important for the Owner and Design team to carefully review this cost estimate including all line item descriptions, clarifications, exclusions, unit prices, assumptions, allowances, mark ups and contingencies to ensure the estimate reflects the scope of the project.

In instances where the cost estimate is not in line with the Owner's budgetary objectives, PACS can suggest and evaluate alternate methods to assist bringing the project back in line with the desired budget.

PACS has produced the cost estimate based on the widely practiced methods of cost estimating and aims to reflect the fair market value of the construction project. Our aim is to be not the highest or the lowest in the range of bids but to use our experience and expertise in the construction industry to provide the client with a degree of confidence that the project will be close to our calculated estimate.

#### **Exclusions**

This cost estimate excludes the following:

- Premiums for working in inaccessible or partially accessible spaces during construction
- Surplus Stock and Spares
- Premiums for restrictive and uncompetitive bidding
- Premiums for non-standard work times
- Work beyond the project limits
- CT Sales Tax Assumes Exempt
- Wellpoints Assumes open trench pumping only
- Rock or Unsuiotable soils remediation
- Hazzardous, Contaminated or Polluted soils
- AV Equipment / Technology Budget
- Utility Costs Electric, Gas, Water (assumes by Owner)

## Risks to the Cost Estimate

Items that may affect the cost estimate, the list as follows but not limited:

- Changes to the design subsequent to the issue of the documents stated above which this estimate is based on
- Non Competitive Bid restrictions and the sole sourcing of products/materials from specific vendors
- Restrictive technical specifications that produce and non competitive environment
- Changes to the project schedule that delay the project and therefore have impact on cost
- Incomplete and poorly coordinated documentation
- Access restrictions, unidentified out of hours work policies and phasing restrictions
- Restrictive technical specifications that produce a non competitive environment
- Unforseen and unknown Site conditions
