Subject: May 23rd audio file

Rob,

While I'm not sure what the issues are, it seems several attempts have been made to get the audio files transferred from Andrea's phone. After close to 4 weeks since the May 23rd meeting, it seems the only available option is putting her phone on play by a digital recorder. There are no videos of the meeting that day. Having access to exactly what was said will be value. Not having it as public record would be a shame.

Thanks,

James McNair

I met with Mario this morning. Andrea is dropping her phone off again in the morning for Mario to work on which she attends the BOE meeting.

Mario worked on her phone last Friday. The issue is where to find the file on her I-phone. She used a downloaded app for the recorder. Mario says the file is not stored in the same place as Apple uses to store data on the phone. He has been doing research as to where on the phone, or in the cloud the files may be stored.

May 17th is also on the phone.

I will suggest playing the phone next to a digital recorder, if tomorrow is not successful. The May 17th meeting is about 140 minutes.

Probably should do the same with Linda's May 25, YouTube video as that meeting was not recorded.
