Subject: Conservation Commission alternate member to be full-time

Good Morning,

As Chairman of the Colchester Conservation Commission, I am respectfully requesting the Board of Selectman move Michelle Kosmo from an Alternate member to a Full Time member of the Conservation Commission. Recently, the commission received a resignation from a fulltime member of the commission, creating a vacant position. Michelle Kosmo, currently an alternate, is valuable member of the commission and her appointment to a Full-Time member would be beneficial to the commission.

Any questions please let me know.

## RESURFACING

## Court Resurfacing

Since 1994, Hinding Tennis has been building and resurfacing tennis courts throughout the United States and in the Caribbean. With headquarters located in West Haven, Connecticut, Hinding Tennis' major client concentration runs up and down the U.S. East Coast.

Resurfacing your tennis court is important in the overall maintenance, upkeep, playability and longevity of the court. Typically, a tennis court should be resurfaced every 4-7 years. This varies depending upon the surface, weather, amount of play, and preservation of the court. Hinding Tennis offers all types of coating and cushion systems and will give you several resurfacing options to keep your court performing at its highest level of playability.

Hinding Tennis resurfaces over 400 courts per year. We retain 90% of our professional workforce yearly, therefore we are not training new court technicians each season. Our quality of workmanship, professionalism and customer service is second to none. Examples of our projects include Chelsea Piers, Stamford CT; U.S. Coast Guard, New London CT; and Match Point Tennis, Brooklyn, NY.

# **SQUEEGEE MARKS**

Acrylic color surfacing systems are generally applied with a squeegee in multiple coats. Most systems include one or more filler coats, followed by two to three coats of color. Some systems also include texture or cushion coats between the filler and the top coats.

There are several theories regarding the application of color coatings. In any case, coating systems must be applied smoothly to a uniform thickness over the entire court surface. This requires an experienced applicator and careful attention to the technique.

Even when color coatings are applied with care by a skilled operator, some squeegee marks and other slight variations in color and texture are inevitable. This is because the formulation of acrylic causes components to migrate to the edge of the material as it is being applied. As a result, an observer will be able to locate the spot where the acrylic material was poured on the surface, where the squeegee operator turned to make a pass in the opposite direction or where one pass overlapped another. Squeegee marks will be more visible on lighter colors and more common when coatings are applied in hot weather or when they include coarser sand. Humidity, angle of the sun when the acrylic is applied and other factors also may affect frequency and visibility of these marks.

Due to the nature of the material and the human element in tennis court construction, squeegee marks are likely to occur, like marks in newly vacuumed plush carpet or newly mown grass. They will not affect play and will become less visible as the court wears and ages.

While squeegee marks are within industry standard, more serious flaws – ridges, drips, tool marks, foot prints, bucket marks and areas of excess material - are unacceptable and should be corrected by the surfacing contractor.

Differences in site, weather and soil conditions require variations in construction and repair methods and materials. Readers are advised to consult a qualified contractor or design professional before undertaking construction or repair of a court. Rev. 03/04

## **BIRDBATH** Sow spots

## "Birdbath" is a term commonly used in the tennis industry to describe a low area on a tennis court that holds water.

More precisely, the American Sports Builders Association (ASBA) defines a birdbath as any area where standing water more than 1/16" (2mm – commonly measured using a nickel) remains after drainage of the area has ceased or after one hour of drying at 70 degrees Fahrenheit in sunlight. Birdbaths delay play on the court after rain and may cause staining and/or peeling of the surface.

### Among the causes of birdbaths are:

- 1. Unsuitable material in the subsoil;
- 2. Inadequate drainage around the tennis court;
- 3. Improper slope or grade;
- 4. Inadequate compaction of the subgrade; or
- 5. Paving error

Paving and surfacing, even with laser-guided equipment, involves both skill and judgment. The number of variables impacting the paving and surfacing processes makes it unreasonable to expect perfection. Minor depressions in the

surface, those less than 1/16" deep or those that drain or dry in under and hour, are considered within tolerance and are acceptable. In a new or recently resurfaced court, however, the contractor should correct birdbaths.

Because site selection, design and construction can involve compromise, even properly designed and constructed courts may develop birdbaths over time. Tennis courts sometimes are built on sites which are reclaimed or which have been deemed unsuitable for other purposes. In such cases, less than ideal subsoil, grade, or drainage conditions may exist. Additionally, over time, new circumstances may arise which lead to settling or drainage problems.

The owner's expectations regarding repair of birdbaths should be based on the nature of the birdbaths that exist to be repaired and the amount of money budgeted for the repair. Owners also should understand that available repair methods and materials are imperfect. Complete removal of standing water may be impossible. Generally the owner should accept that repair of the birdbaths is only a means of reducing the inconvenience they cause and extending the useful life of the court.

The number, size and depth of birdbaths is another consideration. The existence of multiple birdbaths or major depressions of ½" or more may indicate more serious problems. Repairing multiple or deeper birdbaths is labor intensive and often results in cosmetic imperfections, which may require resurfacing to correct. The larger the birdbath, the more difficult it can be to repair.

Differences in site, weather and soil conditions require variations in construction and repair methods and materials. Readers are advised to consultaqualified contractoror design professional before undertaking construction or repair of a court. Rev. 11/10

# MAINTENANCE

## Maintaining your court is one of the most important things you can do to preserve the longevity of its appearance. Like changing the oil in your car every 3,000 miles, properly cleaning and inspecting your court once a year is very critical.

To maximize the useful life of any type of court, we recommend that owners develop and implement a regular schedule of maintenance. Regular inspection and repair of minor irregularities is more cost effective than allowing the court to deteriorate to the point of requiring major repairs.

Our maintenance programs include servicing both All Weather and Har Tru Courts. For all weather courts, we recommend you pressure wash once a year, check for cracks, grease net post cranks, check mesh and tighten fence and install your net. Our Har Tru reconditioning includes removing all the dead material. Installing new Har Tru, grooming court, checking fence fabric and tightening, greasing net post cranks and installing your net.

Call us today to inspect your court and for a free non-obligational estimate.

## WARRANTIES

Hinding Tennis stands behind their workmanship. All of our work comes standard with limited warranties. Below is list of the work that is guaranteed and what you can expect from us.

Riteway Crack Repair — This repair method is a more permanent repair. Its exclusive technology is state of the art - there is no other repair that has the long term effects as the Riteway System. We have seen this repair last for up to 10 years without cracks returning. We do guarantee the existing cracks for two (2) years. We cannot however guarantee against new cracks forming in a new location. *No Dead Spots, Hollow Sounds or Bubbles.* 

Performance Court & Cushion Extreme — This repair method is the most recommended for the cost. This unique overlay system will cover the entire court and is guaranteed for 3 years. This system will cost you a bit more money than the Riteway Crack Repair, however, not only does this system guarantee the entire court, it offers a "**cushloned**" feel to the court, which is easier on the body/joints, and players often say they can play longer and feel better afterwards. The warranty does not cover any sub surface or drainage issues, unless we have built the court for you. If you want a guarantee for the entire court, this method is your best option.

Standard Color Coating, DecoTurf Cushion, New Court Construction — These particular installation methods are considered our "**standard**" methods. This workmanship comes with a 1 year warranty. The warranty covers any peeling, chipping or fading of the acrylic coatings. On new courts, we strongly recommend saw cuts in the asphalt. We cannot guarantee against cracks forming, however, we can guarantee that we will install the best possible base and drainage to help prevent from future cracking. Post Tension Concrete slabs is the only method that is guaranteed from cracking for up to 10 years.

Optional Crack Filling — This typically is a temporary quick crack fix and thus makes your courts safe and playable. There is NO WARRANTY on this workmanship. In fact, we can guarantee that the cracks we fill will most likely open up within 6 months to 1 year. Other than price consideration, Hinding Tennis does not recommend this crack repair method.

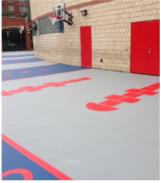

None of our warranties are covered by acts of god, excessive wind storms, vandalism or vehicular traffic. Trees and roots that may fall or enter onto the court are also not warrantied. If the court is not properly maintained or serviced over the years, the warranty may be voided. The warranty does not cover drainage issues, sub surface issues or settling issues. Unless we have built the court new for you, we do not know how the court was originally constructed and thus it would be impossible for us to guarantee someone else's work.

When choosing your contractor, make sure you read through their warranty policy; many contractors offer up to 25-year warranties, however these warranties are only as good as the paper they are written on. Any warranty that is longer than 5 years is simply not possible and I can guarantee the contractor will find ways around it if you have an issue. At Hinding Tennis, we will do our best to work with you even when your warranty is no longer valid, because it is the Hinding Tennis reputation on the line.
