Re: **REVISED** 2022 Grand List Totals

---

It is with great regret that I must inform you that there was a substantial clerical error on the 2022 Grand List which resulted in \$16,650,000 being included in the Grand List totals in error.

The error occurred due to a miscommunication between myself and my staff regarding my wanting a zero value on the tax stabilized fuel cell until AFTER the Grand List was filed. This misunderstanding allowed the \$16,650,000 value to remain in the computer and become incorporated in our Grand List memo issued in January.

The revised Grand List memo with the correct totals is attached.
