Subject: Wall St - 20 units

Stacey and Ariel,

Greg has addressed all the issues I previously had regarding the subdivision being proposed off Wall St. Greg confirmed the two new hydrants will have hydrant gates installed.

I'm comfortable with this proposed 20-unit multifamily housing development being approved by the Planning and Zoning Commission with the condition that the Water & Sewer Commission moves forward with this housing development connecting to the existing water and sewer system. The Water & Sewer Commission is scheduled to meet on Wed Sept 28, 2022.
